WANT OF QUININE.—A Philadelphi journal anticipates great distress at the South for want of quinine. It foresees with the rare sagacity that always distinguishes the journals of the city of brotherly love, a great adjunct for the North in this great deficiency in the Southern materia medica. It says: "When the fall fevers visit the rehels, the want of this indispensable drug will be most seriously felt. It should be so managed that none of it could fall into Southern hands."

Really this journal is an apt imitator of Mr. Perceval, who gravely enumerated the strait-ening of the materia medica as one of the ening of their material medical as one of the inconveniences likely to incline the Freuch to peace. The inimitable Peter Plymley has embalined the memory of this plan thus, and we commend it to this Philadelphia journal:

"At what period was this great plan of conquest and constitution developed? In whose mind was the idea of destroying the pride and the plasters of France first engendered? Gentlemen:—The confidence I have in Perry Davis'
Pain Killea as a remedy for Colds. Coughs. Imrus
Sprains, and Rheumatism, for the cure of which
have successfully used it, induces me to cheerfully
recommed dis virtues to others.

used for that purpose; but having suffered intensely
from informer one, and having no other remeds at
hand, I applied the Pain Killer Ireels for about fitteen minutes at evening, and repeated the applica
tion very briefly the next morning, which entirely
destroyed the felon, and increased my confidence in
the utility of the remedy.
Yours truly,

Usurpations and Tyranny of Lincoln's Rule. Notwithstanding the great care and pains taken by the framers of the Constitution of the United States to guard the rights of persor and of property against the "necessities" that usurpers and tyrants always found convenient to destroy; and notwithstanding the care to include, as a principle not to be mis-taken, that property of every kind should be free of confiscation, except for the life of the owner, even in war, as shown in my former arricle, we have seen the Constitution wholly disregarded, richenfed, contemued, even b our own people, upon the streets of our Capi-

To show, further, how jealous our fathers were in having the rights intended to be se-cired under our Government placed beyond the contingency of "necessity," and other maxims of war, amendments were required to be made to the Constitution declaring that "Congress should make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances."

"The right of the people to be seenre in their persons, houses, papers, and effects, ugainst unreasonable searches and seizures, should not be violated; and no warrants should issue but upon probable cause, supported by oath or affirmation, und particularly describing the place to be searched and the person or thing to be seized."

"No soldier should be quarrered in time of peace in any house, without the consent of the waer, nor in time of war, but in a manner to be prescribed by law.'

These are as many of the amendments as we can notice to-day. In each and every one of them, it is manifest the framers of the Constitution were attempting and intending to define so unmistakably rights of persons and property 1 of to be infringed in peace or war, that no utilitary men, or civil ones either, phis and Western Teunesse. could misunderstand their purpose.

The Occupation of Columbus by the Confederates --- The Reason for it --- A Proposition for

He says his movement was based on reliable information received by him, that the Federal forces were preparing to at once take possession of these important strategic points; that the importance of these positions to the defenes of Western Tennessee and the safety of his command in his opinion made it necessary that he should anticipate their movements; and that the correctness of the intelligence on which he acted is corroborated by the fact that when he reached Columbus the Federals were drawn up in force on the opposite side of the river, ready to cross. Gen. Polk closes his communication to the Governor, with a proposition, in substance, that the Confederate forces and the Federal forces shall be simultaneously withdrawn from Kentucky, the belligerents giving reciprocal gnarantees that the neutrality of Kentucky shall

This is the truth of the matter. Whether Tennessee acted wisely or well is another question, but the General commanding the Confederate forces occupied the points alluded to, not because he wished to violate the neu-trality of this State, but because his enemies and ours, having already armed men on our soil, were preparing to take a position which commands to some extent the city of Mem-
